SUMMARY

Full Stack Software Developer with hands-on professional experience delivering production web applications across the MERN stack and modern frameworks like Next.js. Currently contributing to enterprise projects at LTIMindtree while independently building and shipping a live, multilingual full-stack application for a client. Comfortable owning features end-to-end — from UI to APIs to deployment.

EDUCATION

B.TECH/B.E.
Computer Science and Engineering

JIS University | JIS GROUP | 2025
CGPA (Upto 6th Sem) : 8.89/10.00

EXPERIENCE

- **LTIMINDTREE — MERN STACK DEVELOPER (FULL STACK)** Deceember 2025 - Present
  - Contributing to multiple full-stack projects as part of a client engagement (Computershare) within the Consumer Services Unit (CSU)
  - Building and maintaining production features across the MERN stack (React, Node.js, Express, MongoDB) and Next.js
  - Completed structured training under the Orchard – MERN Full Stack Program at LTIMindtree's Kalinga Campus, Bhubaneswar, prior to the current engagement

- **THOUGHTS WHATEVER — (CLIENT PROJECT)** [LINK] August 2026 – Present
  - Developed a premium Bengali literature platform focused on literary archives, cultural content, and cinematic storytelling
  - Built full-stack, multilingual (Bengali/English) functionality on a headless architecture — all content is served from the backend with no database — with a scalable structure for multimedia publishing
  - Developed an advanced Reference Library and multimedia content experience to improve literary discovery and reader engagement
  - Implemented SEO and analytics capabilities to improve content discoverability and measure platform performance
  - Built a next-generation admin CMS with RBAC, rights management, publishing workflows, media management, and audit controls

  TECHNOLOGY USED: NEXT.JS, REACT, TAILWIND CSS, NODE.JS (HEADLESS BACKEND, NO DATABASE)

TECHNICAL SKILLS

- **Frontend** - JavaScript, React JS, Nextjs 14, TypeScript, Tailwind CSS
- **Backend** - Node.js, Express.js, TypeScript, PHP
- **Database** - MySQL, MongoDB
- **Programming Languaages**- C, C++, Java, Python

PROJECTS

- **Realtime Chat App** [LINK]
  - Developed a real-time chat application using the MERN stack.
  - Implemented features such as real-time messaging, instant notifications, and auto-generated user avatars to enhance user interaction and experience.
  - Utilized WebSockets to ensure seamless real-time communication between users.
  - Designed and built a scalable backend with Express and MongoDB to manage user data and chat history efficiently.
  - Ensured the application's performance and reliability through rigorous testing and optimization.

  Technology Used :

  Front End: REACT NODE.JS TAILWIND-CSS **Back End:** MongoDB EXPRESS.JS

- **New Campus Management** [LINK]
  - Built a full-featured campus management system on the MERN stack with 6-role, role-based access control (RBAC)
  - Implemented bulk student upload for fast onboarding of student records
  - Redesigned the login experience with a modern UI — deep navy sidebar, dot-grid background, and a polished card layout
